

**Dr. med. Marion Debus**

**Dr. med. Reinhard Jeserschek**

After finishing medical studies in Graz, Austria in 1982, M.D. Reinhard Jeserschek completed his training as a general practitioner and then started as a registrar for general and orthopaedic surgery in Graz and in South Africa. In 1994 he became consultant orthopaedic surgeon at the Medical University Graz, where he still continues with operating in septic, rheumatic, revision and hand surgery. In the past 14 years he treated patients in his private practice from the anthroposophical point of view if desired.

**Dr. med., Dr. med. dent. Gerold K. H. Eyrich**

Born on the 10th of September 1965 in Bamberg, Germany (Confession Roman-Catholic). I completed humanistic Gymnasium (including Latinum and Graecum) in Bamberg with the Matura.

My academic career started at the Justus-Liebig-University Giessen (D) dental school (1986-1991). Medical school (1987-1994) was partly attended while studying dentistry in Giessen and completed after moving to medical school at the Friedrich-Alexander-University Erlangen/Nürnberg (D). I trained as a Maxillofacial Surgery resident during the years of 1994 to 1998. Subsequently I became consultant at the Department of Cranio-Maxillofacial Surgery University Zurich from 1999 to 2004. My clinical experiences with cancer and diseases in the field of ENT were largely enriched by a head neck surgery fellowship in the years 2000 to 2001 in Portland, OR, USA. I also earned a degree in plastic, reconstructive and aesthetic surgery of the head and neck and laser treatment.

My studies and clinical training were followed by a doctoral thesis in dentistry in 1994 at the Justus-Liebig-University Giessen (D), and in Medicine in 1996 at the University of Zürich. In 2004 I earned the Venia Legendi at the University of Zurich.

I am currently practicing Maxillo-facial Surgery in private practice in Lachen, SZ. As a consultant I am practicing at the Hospital Lachen, SZ, the academic teaching Hospital Bamberg and at the University Hospital Zurich.

My personal interest is focused on the mind and body connection in medicine and philosophy. Dealing with the psychological dimension in healing and patient management, especially together in collaboration with L.v.Tscharner, spiritual aspects became a major interest of my practice.
